

note-compiler (set tabcount on span and repeat it on cursor reset?) A simple Markdown compiler, **PDF** **spec subset**

Markdown / Obsidian format spec references at some point_

- *Refactor the renderer*
- ~Word-wrapping~
- Italic underscore, don't skip
- Tab / indent overflowing (set tabcount on span and repeat it on cursor reset?)
 - ~**non-ASCII**~
- **Multipage**
- ~Bolded, italic text~
- CMake
- compile_commands.json
- .h files -> compilation units, linking

- *italic*
