

note-compiler

A simple Markdown compiler, **PDF spec subset**

Markdown / Obsidian format spec references at some point

- API restructure
 - .h files
- libc function utilization
- refactor naive impl
- Quotation marks
 - <https://www.cl.cam.ac.uk/~mgk25/ucs/quotes.html>
- *Numbered list (same as list but with ordering)*
- Remove Obsidian tags (flag to remove n first lines)
- *Bold italic?*
- CMake
- **Memory allocations**
